Organization Profile Form
April 1st, 2017

Organization name: **Vorepass**   JLR Product

Kind of organization: Company

FORENSIC SOFTWARE
Search automation for e-search

Data on the web grows exponentially and a manual search takes a lot of time. The search software Vorepass allows investigators and law officials to rapidly find data and focus exclusively on analysing it. Whether you're a bank, a police officer or a parapublic organisation, you will be able to access the information you're looking for. Regardless if it is for cybersecurity, for fighting cybercrime or fraud (money laundering, mafia connections, scam artists, criminal background check, permit validation, finding suspects who hide under different names, etc.), This software will allow you to automate your searches, effectively eliminating this part of the investigation process.

Products and Services

LazyChamp is a friendly investigation accelerator. It searches the hidden web, where Google doesn't go. LazyChamp profiles:

•   Website
•   Person's name
•   Company name
•   Email
•   Nickname
•   More

In one click and 60 seconds, it queries hundreds of sources of information and produces a report.

To investigate an individual, for example searching with an email, LazyChamp goes on social networks, newsgroups, and blogs.

If you want to search a company or a name, it queries sources like state company registries, security commissions, court judgements and 200 more similar sources.

The essence is always one click, quick report and relevant results.

For a typical investigation with a person's name, email, nickname and company, the number of interesting sources to search is about 600. If you do this search manually by browsing each source and spending 15 seconds, it will take at least 2 hours and a half to complete.
With the software, the same process takes 2 minutes.

Our services

UPDATES

Because of the extremely dynamic nature of the Web, LazyChamp must adapt. It's therefore automatically updated every week with new sources of information and new functionalities.

CUSTOMIZATION

Since the software is flexible, every client can request to integrate his own sources of information, and our average delivery time is one week.
Those requests are part of our service and we don't impose a limit on the number of sources.
Every client can also ask for new functionalities so long as they are related to our core business.

SUPPORT AND TRAINING

Our service includes tech support and training on how to use LazyChamp.
We also offer training by experts from the state police.

Core Competencies:
Expertise in**: Criminal Intelligence, open sources search engine**

Current foreign representation: No X Yes? If yes, please answer the following:
- ☐ Company subsidiary, joint venture or affiliated company (identify)
