## Introduction

The NATO Communications and Information Agency, EUROPOL, The Hague Security Delta and The Hague Municipality welcome you to the International Cyber Security Summer School! During the following three days you will attend lectures by guest speakers and participate in workshops. In the afternoon you are expected to work together with your team on your project under the supervision of your mentors. We also organized fun social activities in the evenings for you to get to know each other better. We will end the summer school with a beach club party in Scheveningen. Good luck and have fun!
